**DETAILED ACTION**

***Response to Amendment***

The amendment filed on February 17, 2009, has been entered and acknowledged by the Examiner.

Claims 2-3, 5, 8-11, 13-19 are pending in the instant application.

***Allowable Subject Matter***

Claims 2-3, 5, 8-11, 13-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 2, the references of the Prior Art of record fail to teach or suggest the combination of the limitations as set forth in claim 2, and specifically comprising the limitation wherein an unbaked laminate for producing a front plate of a plasma display device has a glass substrate having a surface on which electrodes are formed, A dielectric layer formed on the surface, and spacer layer formed on the dielectric layer, the laminate consisting of a removable support film, a photosensitive unbaked spacer material layer formed on the removable support film, and a burnable intermediate layer formed on the spacer material layer, the intermediate layer being water-soluble or water-swellaable.

Regarding claims 5 and 14-15, claims 5 and 14-15 are allowable for the reasons given in claim 2 because of their dependency status from claim 2.

Regarding independent claim 3, the references of the Prior Art of record fail to teach or suggest the combination of the limitations as set forth in claim 3, and

specifically comprising the limitation wherein an unbaked laminate for producing the front plate of a plasma display device has a glass substrate having a surface on which electrodes are formed, a dielectric layer formed on the surface, and spacer layers formed on the dielectric layer, the laminate comprising a removable support film, a photosensitive unbaked spacer material layer formed on the removable support film, a burnable intermediate layer formed on the spacer material layer, the intermediate layer being water-soluble or water-swellaable, and a non-photosensitive unbaked dielectric layer formed on the burnable intermediate layer. the dielectric layer consisting of a glass paste material.

Regarding claims 13 and 16-18, claims 13 and 16-18 are allowable for the reasons given in claim 3 because of their dependency status from claim 3.

Regarding independent claim 8, the references of the Prior Art of record fail to teach or suggest the combination of the limitations as set forth in claim 8, and specifically comprising the limitation wherein a method for producing a front plate of a plasma display panel having a glass substrate having a surface on which electrodes are formed. A dielectric layer formed on the surface, and spacer layers formed on the dielectric layer, the method comprising the steps of forming on the surface of the substrate a non-photosensitive unbaked dielectric layer consisting of glass paste material, a burnable intermediate layer which is water-soluble or water-swellaable, and a photosensitive unbaked spacer material in this order, irradiating the spacer material layer with a patterning light, and developing the spacer material layer, to constitute a

patterned spacer layer, baking the non-photosensitive unbaked dielectric layer, the burnable intermediate layer, and the patterned spacer material layer simultaneously, to burn up the burnable intermediate layer and form the dielectric layer and spacer layers on the glass substrate simultaneously.

Regarding claims 9-11, claims 9-11 are allowable for the reasons given in claim 8 because of their dependency status from claim 8.

Regarding independent claim 19, the references of the Prior Art of record fail to teach or suggest the combination of the limitations as set forth in claim 19, and specifically comprising the limitation an unbaked laminate for producing the front plate of a plasma display device having a glass substrate having a surface on which electrodes are formed, a dielectric layer formed on the surface, and spacer layers formed on the dielectric layer, the laminate consisting of a removable support film, a photosensitive unbaked spacer material layer formed on the removable support film, a burnable intermediate layer formed on the spacer material layer, the intermediate layer being water-soluble or water-swellaable, and a removable protection film covering a surface of the laminate, the surface being on the other side of the removable support film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne M. Hines whose telephone number is (571) 272-2285. The examiner can normally be reached on Monday through Friday from 8:00-4:30.
